

TWIN2X2048-8500C5D

The Dominator Series Twin2X2048-8500C5D is a 2048 MByte matched pair of DDR2 SDRAM DIMMs built using Corsair's latest high performance heat sink with Dual-Path Heat Xchange (DHX) technology. This part delivers outstanding performance in the latest generation of dual-channel DDR2-based motherboards. It has been tested extensively in multiple DDR2 motherboards to ensure compatibility and performance at its rated speed. This memory has been verified to operate at 1066MHz at latencies of 5-5-5-15. Performance of these modules incorporating DHX can be further enhanced by using the optional Dominator Airflow Fan, for even more cooling and protection.

Dual-path Heat Xchange Diagram

- Optimized fins to maximize ambient airflow through the module array
- Extruded aluminum heat sinks to maximize convective heat dissipation
- Dedicated PCB heat sink

TEST SPECS

- ▶ Each module pair is tested together at 1066MHz
- ▶ Tested and packaged in pairs
 - ➔ Packaged together immediately following system test
- ▶ Tested at latency settings (5-5-5-15-2T) at 2.1V at 1066MHz
- ▶ SPD programmed at:
 - ➔ JEDEC standard 5-5-5-18 values at 800MHz
 - ➔ EPP: 1066 MHz, 5-5-5-15-2T, 2.1V

FEATURES

- ▶ 2048 Megabytes of DDR2 memory
 - ➔ Two matched CM2X1024-8500C5D modules
- ▶ Using DHX technology providing maximum cooling
- ▶ Performance can be enhanced if optional Dominator Airflow Fan is used
- ▶ Enhanced Performance Profiles allow automatic overclocking to aggressive performance settings
- ▶ 100% tested at 1066MHz in high performance DDR2 motherboards
- ▶ Lifetime warranty

DOMINATOR

Every part is tested in Corsair's factory at 1066MHz, but your actual results may vary depending on the overclocking margin of your CPU and motherboard. Newer motherboards may be used for production test as they become available. Corsair may periodically update the part with newer RAM revisions of same or greater performance. RAM used on the module may change without notice. © August 2007 Corsair Memory, Inc.
